

PRINT YOUR OWN
**FOXY
 GAME
 BOARD**

Print out the two halves of the board onto the thickest piece of paper you can find. Then carefully cut it out along the dotted lines, tell an adult what you are doing, so they can help you with the tricky bits.

Very carefully glue the Left Hand Side of the board to the Right Hand Side, the grey picture will show you where.

You will need a dice and playing pieces, perhaps you could use plastic bottle caps, a different colour for each player. Then throw the dice and climb up the board to see who wins.

Happy playing and keep away from those green arrows!
